DE LAVAL

CREAM SEPARATORS
SAVE MOST IN SUMMER

THE De Laval Cream Separator effects a greater saving in quantity and quality of product over gravity setting during the hot weather than at any other time and its saving over other separators in time, labor, quantity and quality of product is also greatest at this season.

There is every reason why every cow owner, even if he has the milk of only 2 or 3 cows, or whether he should put a stop to his cream waste by installing a De Laval at once.

We can easily demonstrate to you that the money you will save, even if you have only 2 or 3 cows, or whether you have no separator or an inferior one, will be sufficient to more than pay for the machine. Come in and ask to have the reason why 98% of the world's creameries use the De Laval exclusively explained to you.

Brown & Schleicher
EAGLE LAKE

Decidedly the most successful banquet ever given in Eagle Lake was enjoyed at the Odd-Fellow hall last night, following the public installation of officers of the Rebekah and Odd-Fellow lodges which was held in the opera house. The Odd-Fellow officers installed were: W. S. Campbell, noble grand; Walter Adams, vice; Fritz Engelhard, sec; the Rebekahs: Miss Kate Pegram, noble grand; Miss Johanna Baring, vice; Mrs. E. W. Hanly, sec. After the installation, Senator J. E. Kaufman of Galveston, an Odd-Fellow for a quarter of a century, was introduced by Mayor P. P. Putney. Senator Kaufman delivered one of the finest addresses ever heard in this city. At the close of his address, all were invited into the Odd-Fellow and Rebekah hall where a splendid banquet of barbecued meats, salads, sandwiches, pickles, every kind of cake and each kind the best—and the already famous Eagle Lake Creamery Co.'s coffee was served. Lack of time prevents us from giving a fuller account of this most excellent banquet, which was greatly enjoyed by a large number, and the editor returns thanks to the Odd-Fellows that he was fortunate enough to be among the invited guests, and he regrets that owing to the nearness of press hour, a fuller account of the affair can not be given, for it deserves the best of everything that can be said about it.

WANTED—Three or four cars of good prairie hay. BROWN & SCHLEICHER

Notice For Depository Bids.

Notice is hereby given that sealed bids will be received by the City Secretary of the City of Eagle Lake, Texas, to be acted upon by the City Council of said City, at its regular meeting, to be held on Tuesday, July 16th, 1912, from any banking corporation, association or individual banker, doing business within said City, that may desire to be selected as the city depository of all the funds of said City.

That all bids shall be delivered to the City Secretary of said City by July 16th, 1912, said bid or bids shall state the rate of interest to be paid upon daily balances of said funds that said banking corporation, association or individual banker offers to pay said city for the privilege of being made the depository of all the city's funds, for the year following the date of such meeting. The City reserves the right to reject any and all bids.

Given under my hand, this 27th day of July, A. D. 1912.

P. P. PUTNEY,
Mayor, City of Eagle Lake, Tex.
Attest:
O. B. DAVIS,
City Secretary, Eagle Lake, Tex.

Avoid Paint Troubles— Buy Paint to Suit Our Climate

Explanation of Map
Each American manufacturer heretofore has made his paint on the same formula for all sections alike—on the assumption that this is a one-climate country. Naturally different brands would have different formulas. But no one brand ever has been made on more than one formula—until Lincoln Climatic Paint came on the market.

When you buy this world-famous paint you can be sure that it is suited exactly to your locality. It not only beautifies, but will endure. It will not crack, check nor peel with the various changes of our weather, because it is made especially for you and so and everybody in your neighborhood. We have just received a large shipment of this Climatic Paint—the paint that has won international fame as the only paint manufactured on four separate formulas. Call on us and see it and at the same time examine our elaborate climatic map of the United States.

Note what symbol designates your climate—and be sure it is the one you buy. When you call we will hand you FREE an interesting booklet giving the secrets of Lincoln Climatic Paint. Ask for one.

The creamery company started making ice cream right on the jump after starting up about the middle of the week. Orders came in faster than they could be filled and the ice cream man has been a busy fellow this week. The company shipped out about 200 gallons of ice cream for 4th of July celebrations in this neighboring territory and all stock on hand was sold out clean on Thursday night. The machinery for making butter arrived this week. It is being set up this week and the company will be ready for churning next week.

includes the cost of the paint, plus the labor of putting it on. The paint that will cover the most surface—that looks the best—that lasts the longest—that satisfies the buyer—that pleases the painter—that does not crack or peel—that wears the smoothest—that holds trade—that wins friends—that has a reputation—that is absolutely pure.
