

Studebaker

Why You Take No Chances

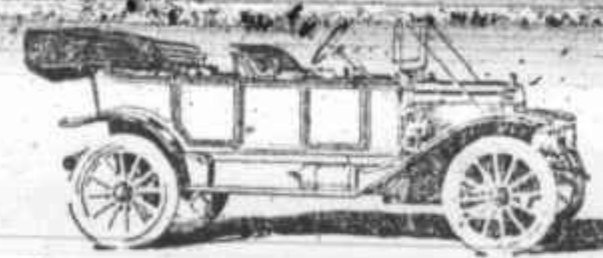

The Studebaker name for sixty years has been a guarantee of quality. It eliminates the slightest element of chance in your purchase of an automobile.

Every part of a Studebaker car is made in our own plants. We analyze and absolutely know the materials which go into our cars. Our guarantee is good.

75,000 Studebaker cars are on the road and every owner will tell you that a Studebaker car always makes good.

We know that the Studebaker (Flanders) "20" at \$800 is equal in material and workmanship to any car built—and the price is within your reach.

Ready for immediate delivery.

The \$800 Studebaker (Flanders) "20"

Price, Standard Equipment, \$800 f. o. b. Detroit. Equipped as above, with Top, Windshield, Spare Tire, and Speedometer, \$850.

Ask our dealer for the new Studebaker art catalogue or send to us for it.

The Studebaker Corporation Detroit, Michigan

SMITH AUTO CO.

EAGLE LAKE, TEXAS

Three carloads of peaches have been shipped into Eagle Lake and retailed out here during the past ten days. The prices ranged from \$1.50 to 75c per bushel. No doubt there will be plenty of peach preserves in this community this season.

If you are a housewife you cannot reasonably hope to be healthy or beautiful by washing dishes, sweeping and doing housework all day, and crawling into bed dead tired at night. You must get out into the open air and sunlight. If you do this every day and keep your stomach and bowels in good order by taking Chamberlain's Tablets when needed, you should become both healthy and beautiful. For sale by all druggists.

Messrs. Horace McRee, Ben Callison and Frank Douglass returned Tuesday from a ten days' visit to Colorado. They report a delightful visit.

A very considerable item of loss to the railroads is the useless waste in handling freight, which is largely due to wanton destruction by the men who handle it at the freight depots. It is marvellously strange that the railroad authorities allow their employees to deliberately smash up the freight as they do when the least particle of care would save the railroad companies thousands of dollars annually in paying on smashed up freight. It is inconceivable why such wanton destruction is allowed, when it is not at all necessary.—Taylor Democrat.

Mr. C. H. Selhaver was a business visitor to Elgin last week.

Miss Myra Walker is visiting in San Antonio.

TEXAS PEACH CROP SELLS FOR \$7,000,000

OVER 4500 SOLID CAR LOADS SHIPPED FROM STATE

TEXAS PEACH IS A WINNER

The Texas peach is the King of Fruits and the fruit of Kings. It is invited into the parlors of the great and is welcomed in the hotel of the poor of both hemispheres. It has met its rival at home and abroad on most every table on the globe and by its natural beauty and delightful personality it has conquered all competitors and today its appearance in the market is an annual event of importance in every household in America and its disappearance is the consumer's regret. Public interest is so deeply centered in its arrival at the market that it travels in special trains running at full speed in order to relieve the anxiety of the waiting public and its welcome have been greeted in order to prolong its stay in the community. Canneries and evaporating plants are run day and night during the peach season in order to preserve its eating qualities for the table of the nation during the entire year.

The family peach tree can be found in most every county in the State, but the commercial peach belt is confined largely to East Texas. The exact number of bearing peach trees in the State is not of record but competent authority estimates it at seven millions. During the peach season of 1910 we shipped to the market 4500 cars of peaches and supplied our local wants as well as run our canneries during the peach season.

The peach industry has been pouring into the channels of trade a golden stream of wealth. The farm value of the peach production in 1910 is estimated as high as \$7,000,000. The rapid growth of the industry during the past decade and the wide extension of the commercial peach belt has been one of the marvels of our development.

At first the Texas peach entered the market under an assumed name, masquerading as a California product, but it soon threw off its disguise and like all native Texas, outstripped its competitors and today it is master of the world's trade.

Notice to Garwood People.

Dr. E. C. Beck, dentist of Eagle Lake, will be in Garwood on Wednesdays and Thursdays of each week, beginning on August 7th and 8th. All work guaranteed.

COAL—Steam and domestic—Phone 19.

W. E. LENHART.

FOR SALE—A nice residence and three large lots in the Semprez addition. Cheap. Write W. E. WILSON.

Mrs. Sam H. Little and little son left yesterday for a visit to relatives in Schulenburg.

LOST—Bunch of small keys; finder please return to Dr. Mel-dan at So. Pac. telegraph office and be rewarded.

A man who had suddenly become very rich went to live in New York and began to spend money with a lavish hand. He decided that his name needed advertising.

"I suppose," he said, "if I pay enough you can trace my family back to Adam?"

"My dear sir," replied the genealogist, "if you are willing to put up the money, we can prove by evolution that your family existed before Adam."

Magistrate (sternly)—Didn't I tell you the last time you were here that I never wanted you to come before me again?

Prisoner—Yes, sir; but I couldn't make the policeman believe it.

Eagle Lake needs a sewerage system and it needs it badly.

Satisfies

There never was a thirst that Coca-Cola couldn't satisfy. It goes straight as an arrow, to the dry spot. And besides this,

satisfies to a T the call for something purely delicious and deliciously pure—and wholesome.

Mr. Cleveland Gwynn of this city and Miss Fay McHenry, formerly of Houston, were married in San Antonio Wednesday afternoon at 5:30 o'clock at the home of Rev. Mr. Jones, the Presbyterian minister, who performed the ceremony. Mr. Gwynn is one of the most popular young men in Eagle Lake, the youngest son of Mrs. Ella Gwynn, one of this city's most prominent citizens. The bride is a sweet and beautiful young lady. She has often visited in Eagle Lake and is very popular here. Mr. and Mrs. Gwynn returned from San Antonio this morning and are at home at Mrs. Ella Gwynn's. The HEADLIGHT's heartiest congratulations are extended.

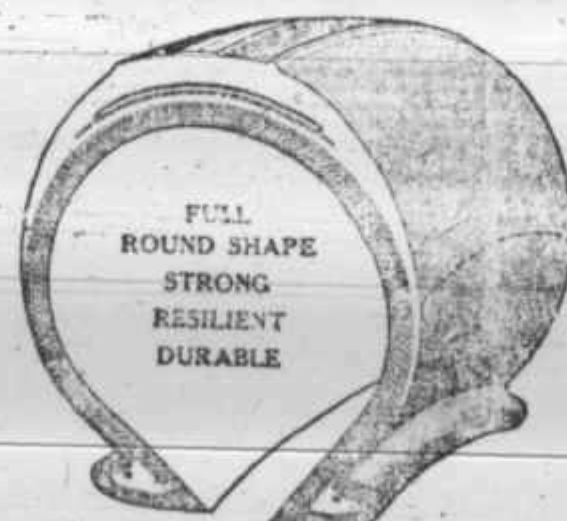

Mrs. Bruce McCarty returned yesterday from a few days' visit to Houston and Galveston.

The terrible itching and smarting, incident to certain skin diseases, is almost instantly allayed by applying Chamberlain's Salve. Price 25 cents. For sale by all drug stores.

The East India Medicine Company is still in the city, this being the second week of their engagement here. The company is showing every night on the Keith lot, and the crowds at each performance are estimated from 350 to 500 people.

Pecan Growing in South Texas

And What This Industry will Mean to Owners of Land Near Eagle Lake

Fortunate is the possessor of landed property in this section, be the property ever so small, if that owner can but realize and take advantage of the importance of the pecan as a commercial investment. The pecan is the king of nuts, and our section is its native home.

The improved soft shell pecan excels the apple, the orange, the fig, the peach, the pear, or any other fruit in productiveness and profit. As a lasting investment there is nothing that will compare with it, for it is still increasing in yield and growth when the apple or orange tree is ready to be cut down in unprofitable old age.

Its planting and culture does not interfere with other fruit or field crops, for between the pecans spaced at 40 or 45 feet apart can be planted the fig, orange, peach, pear, plum, apple or grape, the strawberry, dewberry, blackberry, cotton, corn, peanuts, potatoes, or other field or truck crops, which will add to the income from the land for many years.

Read what honored men say about planting of pecans—read and believe. The following are all authenticated paragraphs from papers and addresses given at meetings of the American Pomological society, the Texas Farmers' Congress, Texas Horticultural society, National Nut Growers' association and from letters by persons of national repute.

Hon. E. W. Kirkpatrick, president of the National Nut Growers' Association: "The importance of pecan growing cannot be overestimated. The pecan tree is one of our greatest natural resources and this fact is being recognized by the foremost men of the south. Unlike other trees, it endures hundreds of years and becomes more valuable with age. He who plants a pecan tree confers a blessing that cannot be equalled by any other calling. More pleasure and profit can be gotten from one acre of pecans than from ten or twenty or more acres of other crops. We should not be deterred from planting pecans on the ground that we have to wait for results, because he who does not plant all waits longer than he who plants. Growing fine pecans is elevating and satisfying. This industry has been vindicated which is pecan and is a fact of which every farmer should be proud."

John S. Kerr, Sherman, Texas: "Pecan orcharding has passed the experimental stage. The phenomenal success so far attained, the profitability and the permanence of the enterprise, the transformation of large areas of cheap lands into abiding gold mines, as it were, is attracting the best talent of the land and the investment of large capital, and there probably can be no better investment. The work of planting the improved pecan is being pushed just as fast as the land and the trees can be made ready. The demand for trees is immense. Who plants pecans provides for both present and future generations."

F. T. Ramsey, Austin, Texas: "On our nursery we grow pecans on black prairie land. Pecans in Texas bear often than they do farther east and are seldom or never bothered with any disease. There is so much good pecan land in Texas that it is unnecessary to talk about the rest. Right near Austin is one tree from which were weighed in one crop fifteen bushels. This has been surpassed by other trees in Texas. The travelers who speak with egotistical complacency of owning an orange grove in California, they 'make me laugh out in merriment.' They just do not know about pecans. The life insurance companies have a rival. Instead of paying \$100 a year premium, borrow \$1,100 on long time and buy land and plant it in improved pecans. The interest will be \$100 a year. The rent on the crop grown between the rows of pecans will pay taxes and interest. Soon the nuts pay the loan, then before many years you collect the full amount of your insurance each year and have no premium to pay, and you leave your heirs something very much better than an insurance policy."

Hon. H. E. Van Deman, Washington, D. C.: "There are pecans in Louisiana that have been known to bear as much as ten barrels of nuts in one season. There are pecan trees growing today that are over 500 years old. Who plants a pecan tree provides a life insurance which no company in the United States can compare. I am planting 600 acres to pecans and expect to plant 500 acres more."

The late C. Paulkner, first president of the Texas Nut Growers' association, said: "Many people think the pecan is a difficult tree to grow, but if you take care of it at first, it will later take care of itself. No tree resists drought more than the pecan. Let everyone plant the pecan."

Luther Burbank, the California plant wizard, says: "If I were a young man, I would go to Texas, knowing as I do the possibilities of the pecan industry, and devote my life to propagating new species of the pecan as I have done in other horticultural lines here. A young pecan is superior to our walnut. Why not develop it? I can not think of any kind of diversification that will pay the southern farmer as well as pecan growing."

Prof. W. N. Butt, State Horticulturist, of Raleigh, N. C.: "Prospective planters are often shocked by the high price of pecan trees, which are quoted at 50c to \$2.00 each, as to size. These prices for grafted and budded pecan trees are only commensurate with the high cost of producing them. The high cost of seed, the slowness growth when young, the high cost of scions and buds of good quality, the small per cent that makes good trees, and the heavy culling necessary, the extra cost of digging the long roots and the careful handling required, all conspire to make these prices legitimate. Again, considering that only 17 to 27 trees are required per acre, and the importance of setting good trees, the price is not excessive."

Prof. John Graig, of Cornell University: "A ten year old apple orchard is worth \$1000 per acre, and has to be replanted in from 20 to 40 years, while a pecan grove is planted forever and a day."

Bulletin, Texas Farmers' Congress: "The demand for pecan nuts is far ahead of the supply, and growing rapidly. The whole world is looking to the United States for its supply of pecan nuts. Shall we supply them?"

"Pecan Culture" was the hobby of a few persons a few years ago, and these were considered cranks. Today the man with a pecan grove is the envy of his neighbors, and thousands are striving to get in the class with him. The fact that every grower of pecan nursery stock is planting an orchard of his own is abundant evidence of his own faith in the industry. Land planted to pecans can be farmed for years, or other orchard trees, such as the fig, orange, etc., can be planted between and produce profit bring crops for years. In Georgia is one of the oldest improved orchards in the country, 80 acres in pecans, for which \$80,000 was refused, and in another place an 11 acre grove for which \$25,000 was offered and refused.

The opportunity is open to all who will seize it. Here on our lands at Eagle Lake we have demonstrated that pecans will grow. Seedlings that we have grown have in one year penetrated the subsoil to a depth of 5 feet. No other tree that we know of has made such a remarkable root growth. Seedlings are grown to form root and stock for the buds of the improved soft shell varieties. The difference between the improved varieties and the native (usually found in the markets) is that the native takes 120 to 200 nuts to make a pound, while the improved varieties are so large that only 25 to 30 are required to make same weight. The improved, besides being larger, are better flavored and the kernels are easily secured whole on account of the soft shell and easy separation.

We have planted out hundreds of improved budded trees and find that the old bugaboo about difficulty of transplanting is a fallacy, for the percentage of loss is almost nothing.

We are prepared to furnish guaranteed trees of selected improved varieties, to prepare the ground for orchard, to plant the trees properly and to care for them as they should be under improved conditions.

We are prepared to not only plant the pecans, but we will also plant for you the filler trees, the figs, oranges, peach, pear, etc., as you may desire. We strongly recommend the fig trees among the pecans for this section. They are planted 15 feet apart among the pecans which are planted 45 feet apart. This gives 164 fig trees and 21 pecan trees to each acre. The figs will produce fruit second year and the third year usually nets a profit that increases annually. The figs will pay for themselves and the pecans too; and when the pecans begin to yield you a profit it is all clear money.

Moreover, between these tree rows the first few years can be planted crops if desired. These crops themselves will not you a clear profit. We will gladly give full information to all who are sufficiently interested to write us.

As to the future of this section, there is none where bigger opportunities offer to the average man. Land values are steadily increasing and the country being rapidly settled and developed. Markets are better than can be had in California or the Pacific country. The climate excels that of any other section of the United States. People are hospitable and ready to welcome new neighbors from the north, the east or the west—yes, the west, for many are coming to Texas from the famed lands of California, and are finding here bigger and better opportunities and more agreeable climatic conditions.

We hope to hail you as a neighbor here at Eagle Lake.

Yours for a home in Texas.

Negro Baptists at Weimar

Weimar, Texas, July 31.—The

LaGrange Baptist Association

convened in this city

this morning and will continue

in session up to and including

the 5th day of August. An at-

tendance of several thousand is

expected. Already many dele-

gates and visitors have arrived,

including Dr. Toliver of Wash-

ington, D. C., F. W. Gross, pres-

ident of Houston college; J. M.

Codwell, educational secretary

of Texas, and other notable Ba-

ptists of the country. P. R. Mc-

Graff of this city is moderator

of the association, and M. M. Rod-

gers of La Grange is secretary.

The meetings of the association

are being held in the colored peo-

ple's park in the eastern suburbs

of the city.

Since the report that South

Texas will produce a big cotton

yield this year, the circuses are

making arrangements to invade

the state. Three large circuses

are scheduled to visit this section

of the state during the fall.

Mr. Jack Yarell was a visitor

to Palacios this week.

In the primary election here

last Saturday Messrs. T. W.

Davis and T. J. Wilson tied for

the office of public engineer, each

getting 51 votes. Their names

were far down the long ticket

used at the polls, and most voters

thinking that there was no op-

position to the county or precinct

officers very few voted at all on

this race, most of the tickets go-

ing into the box without either

name being scratched. The two

gentlemen named above ran for

the nomination before the white

man's primary in May, but

though Mr. Davis held a receipt

for the amount required to have

his name placed on that ticket,

through some error it was left

off. It is thought that this tie

will be decided at the general

election in November.

LADY WANTED

To introduce our very complete Fall line of

beautiful wool suitings, wash fabrics fancy

waistings, slips, handkerchiefs, petticoats, etc.

To introduce N. Y. City Patterns. First line

on the market. Dealing direct with the mills

you will find our prices low. If others can

make \$10.00 to \$20.00 weekly you can also. Sam-

ples and full instructions mailed in a neat

sample case, shipped express prepaid. No

money required. Exclusive territory. Write

for particulars. Be first to apply.

DE LAVAL CREAM SEPARATORS SAVE MOST IN SUMMER

THE De Laval Cream Separator effects a greater saving in quantity and quality of product over gravity setting during the hot weather than at any other time and its saving over other separators in time, labor, quantity and quality of product is also greatest at this season.

There is every reason why every cow owner, even if he has the milk of only 2 or 3 cows to separate, should put a stop to his cream waste by installing a De Laval at once.

We can easily demonstrate to you that the money you will save, even if you have only 2 or 3 cows, or whether you have no separator or an inferior one, will be sufficient to more than pay for the machine. Come in and ask to have the reason why 98% of the world's creameries use the De Laval exclusively explained to you.
