

GOOD ROADS

PRIMITIVE AND MODERN HIGHWAYS

Improved public highways are the foremost agents of modern progress and prosperity and are as important to commerce as veins are to the body.

The first roads were those made by animals going to and from water and feed. Many of our present thoroughfares were beaten firm by the bare foot of man and have had little improvement since.

Good roads are just as important as good water and no one is any more opposed to good roads than to good water, but strange as it may seem, the farmer said: "The farmer must dig his well at his own expense, while his neighbors help him build roads."

TEXAS HOSPITALITY

We Shake Hands With 250,000 Tourists and Welcome 69,000 Immigrants Annually.

True Southern Hospitality abounds in Texas. We frequently visit each other at our homes, shake hands with 250,000 tourists and welcome 69,000 immigrants annually to their new Texas homes, and royally entertain many National conventions. We have many parks and public places for recreation and amusement.

We are equally as generous and hospitable to capital. We have given the right of way to railroads, factory sites to industrial enterprises, built a new town every thirty days, opened up 6,418 new farms per annum and looked after the comforts and conveniences of all forms of investments, in addition to cultivating 10,000,000 acres of cotton, 8,800,000 acres of corn, 1,232,000 acres of wheat, cut 1,310,000 acres of grass, gathered fruit from 25,000,000 trees, taken care of 13,000,000 head of live stock and manufactured \$178,179,000 of raw material, as well as run the errands of civilization. We are doing considerable construction work, and we offer no apology to visitors for our physical appearance, as our trash is the litter of the workshop and our dirt the smudge of toil; but we are always glad to answer questions and never too busy to show visitors through our storehouse of opportunities; in fact, our

liberality with our advantages has been the marvel of visitors and the opportunity of outside capital.

We Are Good People.

Texas has all of the nobler impulses of human life, and many of our virtues abound to an unusual extent. We entertain capital, and take care of a multitude of investors. We are perfectly frank in our statements and honest in our views and transfer the title of magnificence to opportunities to fortunate purchasers, without envy or jealousy.

TRUTHFUL TEXANS

All Persons Inclined to Prevaricate Should Move to Texas Where Truth Abounds.

To the persons who come to Texas, the things we have, speak in such thundering tones that they can hardly hear anything we say, but telling the truth is one of the strong points of the Texan.

In fact, it is almost impossible for a man to tell an untruth about the magnificent resources and wonderful possibilities of Texas. With all our efforts to describe them, the half has never been told. Many citizens, wholly unreliable in other states, have moved to Texas, where their imagination can revel in pine forests greater in area than the wheat fields of the Dakotas, roam in cotton fields as large as half the New England States, wander over 30,000,000 acres of virgin prairies, explore mountains of minerals and inspect the foundation timbers of the grandest civilization the world has ever known, and highly become perfectly honest and highly respectable citizens. Any person who has the least inclination to prevaricate should come to Texas, where the realities so far exceed the wildest fancies of the most vivid imagination, that it is almost impossible to exaggerate.

In fact, the Texan is, as a rule, very modest in his statements and is so afraid of overestimating the advantages and possibilities of his country, that his conservatism is frequently mistaken for ignorance, and he unconsciously allows his intellect to suffer in order to avoid the remotest suspicion of his morals; but the completion of the Panama Canal will open up such wonderful possibilities that we shall speak out with more courage.

We Are Energetic as Well as Truthful.

There is no more progressive citizen on the globe than the native Texan. He is by nature an architect and by practice a builder. Out of raw prairies and a howling wilderness he has created a magnificent empire; he found cotton a weak and struggling industry and made it the king of products. He has taken the Texas step, a wild, reckless denizen of the plains, and made of him a civilized man.

FIGS A POPULAR FRUIT

EYE'S FAVORITE BECOMES GOLD IN TEXAS PROGRESS.

LARGEST ORCHARDS HERE

The fig was the early companion of man. Its leaves furnished the initial garments for our first ancestors, its fruit nourished early civilization and its foliage has shaded and sheltered man and beast since the beginning of time.

It has had more free advertising than any other fruit in the vegetable kingdom. It figured conspicuously in the episode that resulted in closing the Garden of Eden, the Savior used it in a parable and it is closely woven in ancient legends and in the history of nations. To mention the fig leaf makes mankind smile and to mention the fruit makes the whole world hungry.

It is the most sensational, romantic and popular of fruits. It threads its way through the literature of the world. It is a favorite with the sculptor and the painter; it is one of the most useful of medicines, and with the consumer it is the most popular fruit on the market.

The soil, climate and altitude of the coast country for one hundred miles inland is especially adapted to the hardy growth of the tree and the perfect maturity of the fruit and the skillful horticulturist has developed varieties especially adapted to natural conditions.

It responds generously to kind treatment, makes few demands upon its owner, its yield is reliable and abundant and the tree shows remarkable business instinct in making Texas its domicile.

The fig is the pioneer of Texas fruits and the numerous races of the free have explored most every section of the State, but it has more thickly populated the coast country than any other part of Texas.

According to the Texas Almanac we have 3,710 acres now in commercial fig orchards on the coast country and the planting of an additional thousand acres is under contract. Galveston County leads in fig culture, having 1,225 acres. The largest fig orchards in the world are located in this county. The farm value of the annual output of one acre of bearing figs averages \$250 and the total value of the annual Texas output approximate \$1,000,000.

On the Farm.

"Do you have any trouble in keeping your boys on the farm?" "No," replied Farmer Corn-tassel. "They're willin' to stay. The only difficulty is that they all want to act like summer boarders."

The mare was kicked by another horse and its leg so badly broken that it had to be killed. After the accident, Mr. Mathis placed a rope around the colt's neck and started home with it, and when back of the Hotel Brown the colt reared up, and falling backward crushed its skull from which it died in a few minutes. GOOD ROADS

THE ANNUAL EXPENSE OF MAINTAINING MUD HOLES EQUAL TO ENTIRE COST OF STATE CAPITOL.

Familiarity is said to breed contempt, but the mud hole appears to be exempt from this rule, as most of our citizens have been intimately acquainted with it from infancy and we contribute \$3,000,000 per annum to maintaining it, as well as submit to a tax of \$3,000,000 per annum levied by the mud hole in reducing the capacity of the load. A chain is no stronger than its weakest link and the carrying capacity of a road is governed by its worst mud hole and steepest grade. Improved public highways will do away with the mud hole.
