# JOB PRINTING

In declaring that no man knows one seventh billionth of one per cent of anything, Edison shows that he knows more than most men, since he knows enough to know that he doesn't know it all.

We don't profess to know everything in the printing business, but our equipment, knowledge and skilled printers can produce work that gives satisfaction to our customers.

# THAT'S ENOUGH

All other things being equal you should give your job printing to your home paper, thereby help your town by helping make your town paper a better one.

Quite a large crowd was present at the Dixie last night to witness the opening installment.

Some women were visiting the Boston art museum, when one of them showed a lively interest in certain large plants which had been placed there for decorative purposes. She turned to one of the elderly retainers and asked eagerly, "These plants belong to the banana family, do they not?"

With scorn and injured pride, the veteran attendant answered coldly, "No they belong to the superintendent."

#### NIGHT WATCHMAN ROBERTS IS ALWAYS 'ON THE JOB'

Night Watchman T. M. Roberts is giving the city efficient service. He is always on the job, and is keeping all hoboes "moying on," not permitting them to stop here. If he finds them at night attempting to get off of the freight trains he forces them to "stay on" and beat it to some other town. If he finds them already off and on a train here, he makes them catch the first train coming through and get out of town. This is a fine thing to keep the town free from this element.
