DUCK HUNTING SEASON CLOSING CHRISTMAS DAY

The duck hunting season will come to a close after Christmas day. When the season opened there were thousands of ducks here, but, according to the hunters, the ducks have left for other parts and but few have been killed lately. One hunter tells the Headlight that great bunches of ducks, millions they looked like to him, left during a period of just a few days, all flying west.

Possibly it's due to the shortage of ducks and not a bad aim, that we have had none this year from Jake Smothers or Tom Waddell, thus the two are breaking an established record of fifteen years.

Drugs, Cosmetics and the Full Line carried by High-Class Drug Stores, at Luna's Drug Store.

EX-ROTARY INTERNATIONAL PRESIDENT IS VISITOR HERE

Bob Hill of Columbia, Missouri, who last year served as president of Rotary International, spent last Thursday here hunting ducks. The former president of the International Rotary Clubs, who spent the day hunting with D. R. Wintermann, is an expert marksman, having gone back to Houston in the afternoon with his day's bag limit of ducks.

Now—on every 1937 Ford V-8

NEW EASY-ACTION

SAFETY BRAKES

They offer the following advantages:

1

Self-Energizing Operation . . . gives greater stopping power—with easier, softer operation of the brake pedal.

2

Cable-and-conduit Control . . . gives sure, all-weather operation of brakes—the safety of steel from pedal to wheel.

3

Big 12-inch Rib-cooled Drums, give extra large braking surface per lb. of car weight, and long life for brake-linings.

You can't judge Brakes until you drive the 1937 FORD V-8

HERE'S HOW IT WORKS

As primary shoe "A," is applied against the moving brake drum, the drum helps to apply pressure on secondary shoe "B." As a result, about one-third less pedal pressure is required of the driver.

Four of these brakes, with a total area of 186 sq. ins. give 1937 Ford V-8's greater braking surface per pound of car weight than any other 1937 American-built car. No wonder Ford V-8 brakes are called "Easy-Action Safety Brakes."
