White Calls For Turn-Around In Inflation

Positive action by all food related industries can help make a turn-around in the cost-price squeeze that is crippling our economy and contributing to inflation today, Agriculture Commissioner John C. White said recently.

"I am urging every segment of the food chain to look at all production and sales methods for ways to cut costs," said White. "Today, there is too wide a gap between what the farmer receives for his products and the prices being paid by consumers at the retail level."

Commissioner White said he was grateful that his two weeks of negotiations with ranchers and dairymen recently had helped prevent mass slaughters of calves in Texas.

An earlier appeal this year by White to national food chains brought about some renewed efforts to generate sales of meat at competitive prices. "All food stores, wholesalers and processors must take a hard look for methods that will reduce expenses and then pass the savings on to the consumers," White declared. "The gap between farm and retail prices is wider than at any time in the past 50 years."

Commissioner White said he was grateful that his two weeks of negotiations with ranchers and dairymen recently had helped prevent mass slaughters of calves in Texas.

An earlier appeal this year by White to national food chains brought about some renewed efforts to generate sales of meat at competitive prices. "All food stores, wholesalers and processors must take a hard look for methods that will reduce expenses and then pass the savings on to the consumers," White declared. "The gap between farm and retail prices is wider than at any time in the past 50 years."

White Calls For Turn-Around In Inflation

Positive action by all food related industries can help make a turn-around in the cost-price squeeze that is crippling our economy and contributing to inflation today, Agriculture Commissioner John C. White said recently.

"I am urging every segment of the food chain to look at all production and sales methods for ways to cut costs," said White. "Today, there is too wide a gap between what the farmer receives for his products and the prices being paid by consumers at the retail level."
