CPL Rates

(Continued from page 1)

used for fuel had increased from 27.3c per 1000 cubic feet to 28.1c and other costs of materials, labor and taxes have shown similar increases.

The proposed increase would increase the company's return on an investment of \$800,343,000 to 5.48 percent. The proposed increase would increase the return on investment to 7.8 percent, noted the CPL representatives, and put the company in a more favorable light as far as future financing is concerned.

A visitor at the meeting was Joe N. Frick, president of the CPL representatives on the reason for CPL rates being 44 percent higher than Houston Lighting and Power and suggested that the council consider making a proposition to Houston Lighting and Power to "come seven miles and buy out CPL. I see no reason why we should pay 44 percent more for our electricity," he stated.

CPL representatives questioned this figure and contended that the fuel costs were included in comparative figures and admitted that CPL can buy gas for 58c per 1000 cubic feet while CPL is paying \$1.81.

Both Frazar and H. E. Burger, also a visitor at the meeting, contended that the fuel costs should not have anything to do with a rate comparison since all of the fuel costs are now being passed on to the customers.

They also questioned the representatives about gas being produced from CPL owned wells and if the gas from these wells was being charged off at the \$1.81 rate.

Comparative Rates
The CPL representatives passed out folders showing a comparison of the present costs and for those under the new rate, for the average customer in Eagle Lake (one who uses 693 kilowatt hours of electricity per month). The comparison is based on fuel costs as of June 30, 1976 and the figures below include fuel costs:
