MRS BARD'S

YCC Camp Director Beaumont Speaks To Rotary Rice Field Day July 6

Members of the Rotary Club and guests had an interesting program on the Youth Conservation Corps (YCC) which is active for an eight week period at the Attwater Prairie Chicken National Wildlife Refuge.

Director of the program this year is William (Bill) Carpenter and he told the Rotarians and guests that the 30 young men and women employed in the program are active in various functions, including some construction and repair work, many of them doing this type of work for the first time, "and enjoying every minute of it."

Those enrolled in the program range in age from 15 to 18 years and come from a thirty-mile radius of the refuge.

Carpenter stressed that this is not a poverty-type program and many of those in the program come from some of the area's finest families.

The Attwater Camp, a non-resident camp, is one of more than two dozen YCC camps located in Texas this summer. The program objectives provide gainful employment for qualified youth, combined with development and maintenance of public lands.

Included in the activities are field trips, such as the one made recently to the Houston Natural Museum and the Robert Vines Museum.

Carpenter said that he was especially enthused with the program since it afforded him the opportunity to "work with young people in the wide open spaces."

To add emphasis to the program, he showed a film of some of the resident and non-resident YCC camps in the country and the fine work which they are carrying out and the benefits gained by the young people. The film stressed that safety is one of the main goals of the program.

Club Donates \$500.00

President Jim Stansel announced that the board of directors voted to contribute \$500.00 from the club's 1976-77 treasury toward the renovation and expansion program at the Community Center. He announced further that the club will meet during the construction period at Diderer Hall and the club voted to contribute \$50.00 per month to the Catholic Church for use of the facilities during that time.

CALLING ALL HOMEMAKERS

(By Dorothy Schomberg, County Extension Agent, H.E.)

Lifestyles To Determine "How Short" Is Energy

National energy shortages are relative; they depend on our lifestyles.

If we can't live without energy, we must learn to live with less of it and that means looking for effective ways to cut energy use, as a first step.

Important questions in that regard are:

"Can transportation costs be cut by different family patterns of shopping, housing and recreation?"

"How many appliances are essential?"

"Can we use less water to clean, less heat to cook, less light to see?"

"How much industrial energy can we use by simply reducing excess packaging and disposable 'one-use' consumer products?"

Other questions and answers can stem from a close scrutiny of present energy uses.

Some are: comfortable heating and cooling of air and water for homes, food preservation and preparation and household and personal care activities, such as laundering, washing and vacuuming.

Additional energy uses are transportation of goods, services, information and entertainment by automobiles, radio and television to our homes, along with transportation of water and liquid and solid wastes.

51 To Die In July Fourth Traffic

The Texas Department of Public Safety warns that an unusually high number of traffic accidents and fatalities are likely to occur during the July 4th holiday weekend.

The head of the DPS, Colonel Wilson E. Speitz, estimated that 51 persons could lose their lives in Texas traffic - from 6 p.m. Friday, July 1, to midnight Monday, July 4.

"Based on past holiday experience, we believe many of the traffic accidents during the holiday period will involve either speeding or drinking. Also, it is likely that a high percentage will occur late at night or within a few hours after midnight," Speitz said.

During the July 4th weekend last year, 55 persons were killed in Texas accidents. Department of Public Safety records indicate the deaths were almost evenly divided between city streets and rural highways.

The most prevalent type of collision last July 4th involved only one vehicle.

Summertime "Kitchen Escapes"

Summertime "kitchen escape" tactics are easy and still allow for nutritious meals.

Following is a 10-point "kitchen escape" plan:

Prepare relate desserts; they're easy to prepare and to eat.

Use the outdoor grill for the entire meal including vegetables and breads.

Serve one-dish meals such as casseroles and round out the menu with a cold salad and packaged bread.

Plan menus that cook in the oven at one temperature; this eliminates the extra heat of surface burners.

Prepare your main dish in a slow cooker. Serve vegetables and salads that don't require cooking and last minute preparations.

Serve cold meat salads as a main dish for a change.

Do baking in the early part of the day while temperatures are still relatively cool.

Serve fresh fruits in season for dessert.

Eat out July 4th to serve a break!

EXTENDED COVERAGE

By Jerry Sparks

How can you protect your home against burglary? Listen to the advice of experts. Says one New York City detective:

"Noise and time are the burglar's two biggest enemies." A tough lock and a good alarm as a backup will discourage eyes a professional thief. He knows he could beat them eventually—but he doesn't have the time.

Standard cylinder lock can be picked in 30 seconds—even less if a quarter key is available. Special pick-resistant cylinder offers better protection. Add a guard plate or guard ring, to prevent burglar from pulling out the cylinder with vice grip pliers.

Ordinary locks can often be opened with a piece of plastic. You'll get more protection with a dead bolt lock. A drop bolt is even better.

A good alarm system also serves as a deterrent. A thief will not stay around for even 30 seconds with an alarm wailing. (Be sure you display the decal for your alarm system; in fact, some homeowners stick to the decal and don't bother with the alarm.)

Protect your family and the things you care about with sturdy, pick-resistant locks. But because no lock is perfect, protect yourself with good insurance, too. See the insurance experts at
