

### Miss Karen Faith Stallman, Dr. Baxter Plan Sept. Nuptials

Miss Karen Faith Stallman, a senior at the University of Texas at Dallas, and Dr. David W. Baxter, a resident at the University of Texas at Dallas, plan to be married on September 10, 1977, at 7:30 p.m. at the First Baptist Church in Dallas. The bride is the daughter of Mr. and Mrs. David W. Baxter, Jr., of Dallas. She received her B.S. in Biology from the University of Texas at Dallas in 1974. The groom is the son of Mr. and Mrs. David W. Baxter, Sr., of Dallas. He received his M.D. from the University of Texas at Dallas in 1974. The couple plan to reside in Dallas. They will have a reception at the First Baptist Church on September 11, 1977, at 7:30 p.m.

### Miss Teen Queen Pageant Was Whirlwind of Activity For Runner-Up Kathy Frazier

Miss Kathy Frazier, a Miss High School Junior, recently returned from Ft. Collins, Colorado where she was a contestant in the Miss Teen Queen pageant. Kathy won the title of Miss Teen Queen in Grand Prairie, Texas last September. The pageant was a whirlwind of activity for the contestants. There were hours of rehearsal for the final chorus line revue that was presented by all of the contestants. They were judged on poise and appearance. All contestants presented their talent presentation before the judges and the five finalists repeated their talent presentations before the audience on pageant night. Kathy entertained the audience with a comedy dance routine which was very well received. Tennessee Girl Wins Miss Denise Krag of Tennessee was crowned Miss Teen Queen. Her presentation was also very well received.

### Miss Toodle-oo and Her Helpers

### Gospelettes, KULM Choir To Sing Fri. Nite

The East St. Louis "Gospelettes" will be presented at Booker Memorial Temple, Church of Christ, at 815 Boham Street in Columbus this Friday night, August 12th beginning at 7:30 p.m. The singers have recorded many well known albums "Jesus Affair," "I'll Understand and Say Well Done," and many others. The KULM Gospel Radio Choir along with Mrs. Nannie G. Gable and Michael Axel will also be presented. There will be a special offering for the church.

## RICE RICE... "The Energizer"

# The Budget STRETCHER

America's rice industry is marking another successful year. This industry, which plays an important role in maintaining a sound economy in the rice producing area, deserves recognition. Working together as a team, all segments of the enterprise—from producer to mill—market a uniform, high quality product. A by-product of the industry's advance is business progress in the rice belt.

### Ginger Ribs With Rice Dressing

You'll be glad that you baked the meat on a bed of rice when you prepare Ginger Ribs with Rice Dressing for the rice absorbs all of the meat drippings as well as the spicy honey and lemon sauce as the meat cooks.

Tender cooked rice not only absorbs the flavors of the meat and sauce but of the apricots, onions, and seasonings with which it is mixed before being spread into the baking pan.

Any kind of American grown rice—brown, regular or milled white, parboiled or pre-cooked can be used for this recipe. And tender fluffy rice is guaranteed if the easy cooking directions on the rice package are followed to the letter.

To complete the meal featuring Ginger Ribs with Rice Dressing, serve green beans with slivered almonds, crisp relishes and baked custard for dessert.

Mr. and Mrs. Neal Edward Stallman of Garwood announce the engagement and approaching marriage of their daughter, Karen Faith, to Dr. David W. Baxter of Dallas, son of Mr. and Mrs. David W. Baxter, Jr., of Dallas.

The bride-elect is a 1970 graduate of Garwood High School and a 1973 graduate of the University of Texas at Dallas receiving a Bachelor of Arts degree with highest honors. In 1975, she received her Bachelor of Science degree from Texas A&M University, Sumner run Lando. In 1976, she received her DVM from Texas A&M University, College of Veterinary Medicine, graduation: Sumner run Lando and is a member of Phi Kappa Phi, Phi Beta Kappa and Phi Zeta honor societies.

The groom-elect is a son of John Tyler Hieb in 1970, and received his DVM from Texas A&M University, Sumner run Lando. He received his DVM from Texas A&M University, College of Veterinary Medicine in 1975, graduation: Sumner run Lando. Dr. Hieb is currently a resident in Pathology at Texas A&M University, College of Veterinary Medicine, graduation: Sumner run Lando and is a member of Phi Kappa Phi, Phi Beta Kappa and Phi Zeta honor societies.

### Aircraft Vital To Rice Farming

It was a matter of timing that brought the airplane and the American rice industry into partnership during the late 1940's.

Shortly after World War II, demand for American rice began to increase and more rice began to be planted. There was a surplus of military aircraft adaptable to agricultural aviation and ex-military pilots were returning to agriculture. New insecticides, herbicides and fertilizers were being developed and experiments were begun to ascertain the value of seeding and spraying "aerially" by airplane. The results were astounding.

The airplane solved the problem of moving heavy equipment across flooded fields. Hardier rice varieties which did not require the careful handling demanded by earlier types emerged in post-war years and adapted well to planting by air. The amount of time saved in seeding and chemical application was dramatic.

Initially, the airplane experiments appeared in Arkansas fields in 1938 or 1939 when farmers and the experiment stations tested various methods of seeding. By 1945, Louisiana rice farmers had begun fertilizing by airplane. It had long been known that applying fertilizer midway through the season, in addition to the first fertilizing at planting time, would result in a better crop. But before the airplane was used for this purpose, there was no practical way to get equipment into the heavily flooded fields.

Planting by air began in Louisiana on a wide scale in 1947 and by 1949 the airplane was firmly established as rice industry equipment in Arkansas, Louisiana and Texas. It came into prominence in the rice fields in Mississippi in the 1950's.

Converted army surplus Stearman planes were among the first to be utilized and even today are still being maintained, rebuilt and flown, along with new types of aircraft.

The flying service business has been an outgrowth of this agricultural segment and is used by virtually every rice farmer. Hazardous work, it has been called, "a young man's business."

More profit, a saving of time and better yields have been the results of using the airplane in the American rice industry which has long been noted for its high mechanization and efficiency.

### 1976 World Rice Crop 2nd Largest Ever

The 1976 world rice crop is estimated to be the second largest on record at 342 million metric tons. This is down 3% from last year's record harvest of 353.5 million metric tons. The decline is attributed to a short monsoon season in Asia and other weather problems in major rice producing countries. The U.S. produced 5.3 million metric tons.

World rice trade in calendar 1976 is an estimated 4.3 million metric tons with the U.S. continuing to be the largest world exporter of rice with an estimated 2.2 million metric tons.

Brazil's 1976/77 production is projected to be 7.2 million metric tons versus 8.5 million metric tons the previous year.

India experienced a poor fall monsoon three weeks shorter than usual in combination with pest infestation. These conditions indicate a 1976 harvest of 65.3 million metric tons, down 11% from the previous year.

There are seven major rice exporting nations from which originate 96% of total world rice market exports. They are: Australia, Burma, Italy, Pakistan, Peoples Republic of China (PRC), Thailand and the United States. Of all the rice traded in the world market, the United States is first with 2.2 million metric tons. Thailand is second with 1.8 million metric tons exported and the Republic of China and Pakistan tie for third with approximately 700,000 metric tons exported. Burma exports approximately 600,000 tons, Australia 400,000 tons and Italy 200,000 tons.
