TODAY'S MANUFACTURED HOMES

by Mary Ann Pittman

AFFORDABILITY

Think about it for a minute. What if housing costs dropped by 50% today. Could you afford one? Sure you could.

Well, today you can enjoy what over ten million Americans are already enjoying — a structure, comfortable, manufactured home.

Manufactured homes are built to lasting government standards. These standards provide for quality and energy efficiency.

The most per square foot of a site-delivered manufactured home is about half the cost of a site-built home. Assembly line production methods eliminate most of the inefficiencies associated with a site-built home. Quality control procedures are constantly being followed in the construction of manufactured homes.

Manufactured (site-delivered) homes are appreciating every day.

Come to our display center, and let our professional home counselors show you tomorrow's home today.

Promotion Certificates Following an address by Rice Consolidated School District Assistant Superintendent Charles DeShazo, the eighth grade promotion ceremony was held at Eagle Lake Middle School last Thursday and challenged the eighth graders being promoted to high school to develop positive attitudes and adapt to changes.

Mr. DeShazo noted that the students will find the next four years in Rice high school a "pleasant and rewarding experience," a variety of extracurricular experiences await you and I would encourage you to become involved as an active participant.

He urged them to find answers to the age old questions of "Who Am I? What Am I Doing Here? and Where Am I Going?"

He agreed that the completion of elementary school "is in a sense being on top of the mountain, but to reach the new peak you must in all reality cross other divides."

"If I could say one thing to you it would be to develop a positive attitude. If a person feels good about himself everything falls in place. Look upon your assignments as challenges and participate in classes. Ask questions, and you will be rewarded openly," said the speaker. He added that it is a fundamental truth that one obtains from school what one puts into it.

"We are living in a period of great change which is not your doing. Inflation is frightening and a new experience for Americans. So the only thing we can be sure of is change and you will need to educate yourself to survive. The world will still respect and step aside for a person that knows where he is going," concluded the assistant superintendent.

ELMS Students Urged To Cross Divides; Reach The Peak
