Major Crimes In Texas Are Rising

The number of major crimes reported in Texas during the first six months of 1981 rose 3.3 percent compared to the same period last year, according to DPS Director Colonel Jim Adams. "Although this is a significant increase, it does indicate that the volume of major crimes in our state is rising at a slower rate than we saw last year," Adams said.

In 1980, major criminal offenses in Texas increased 9.9 percent in comparison to 1979.

Major index crimes recorded by the DPS Uniform Crime Reporting Bureau during the first half of 1981 were:

Aggravated assault, 1,143 - a decrease of 2.1 percent from the same period in 1980. The remaining violent crime categories showed increases, with aggravated assault up 3.8 percent and rape and robbery each posting increases of 3.5 percent. The property crime categories of motor vehicle theft and larceny-theft rose 2.5 percent and point-five percent respectively. Total property loss attributed to major index crime in the first half of 1981 was \$400 million.

Agencies investigated 3,941 cases during the period which resulted in estimated property losses of \$50 million. Three police officers were killed in the line of duty by criminal action during the six-month reporting period. Three other officers perished in duty-related accidents.

Former Columbus Coach Carl Andress Files Suit Against Bd.

[By Vivienne Roberts
Colorado County Citizen Reporter]

Former Columbus football coach Carl Andress is suing the Columbus Independent School District and the school board regarding the board's decision last spring to not renew his coaching contract.

Andress, who is now coaching at Henderson County Junior College, refused to make any comment on the suit.

He was named from the Columbus athletic department last April in a closed executive session of the school board. Except for Buddy Anderson, board members voting not to renew his contract gave no explanation, saying their decision was "in the best interests of the high school."

Andress had been with the Columbus athletic program for 22 years at the time. The first hint of a controversy

ROACH PRUFE NO.1 IN-UNIVERSITY TESTS

In a report just released by the UNIVERSITY OF CALIFORNIA, eight commercial and test products that included a broad spectrum of insecticides were tested against a product called "ROACH PRUFE." The report concluded "Our experience under field conditions has shown that when properly applied, the ROACH PRUFE formula provides a degree of cockroach control that is usually superior to all other registered commercial or consumer products."

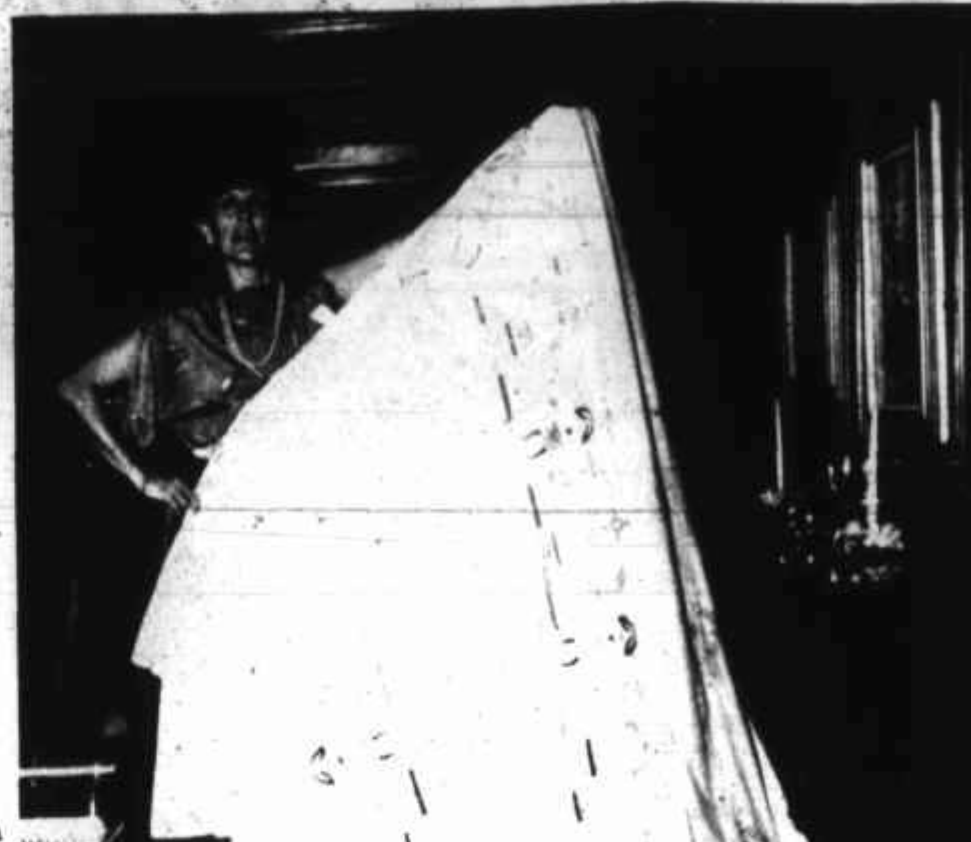

Alan Britte, who 30 years ago developed and lent his name to what is now a standard household cleaner, Roach Prufe, stated: "Because roaches simply do not recognize ROACH PRUFE as an insecticide, they do not try to avoid it by scattering to other parts of your restaurant as they do with the other insecticides. Plus the electrocuted roaches they find in their bodies, which they then carry back into the walls spreading among the other roaches. The result is you kill not only the roaches you see, but also those hiding and multiplying in your walls."

ROACH PRUFE is odorless, non-evaporating, non-staining and non-flammable. It is simply applied with a teaspoon under kitchen appliances and other hidden areas. It can be used in homes, schools, hospitals, restaurants, plus new construction.
