Add "Pep" To Pep Rally

The Garwood Elementary School pep rally week before last raised a lot of spirit. The cheerleaders, twirlers, and a couple of really "good sports" from the football team helped get the spirit to record heights. The boys engaged in a dressing contest (in women's clothes of course) and once they were "decked out" the girls were ready to act as escorts. A couple of cheer-

leaders were needed in plain clothes to set the whole thing up, and they did it with style, as everyone who attended this pep rally enjoyed it tremendously.

The most consumed food in U.S.: fluid milk and cream.

When you weigh the alternatives, you'll heat with gas.

There are two sides to the home heating question. But when you weigh the alternatives, you'll see the best way to heat your home is with natural gas.

A gas heating system is more dependable and more energy-efficient. In fact, a gas heating system operates two-and-one-half times as efficiently as an electric unit.

And when you save that much energy, you can also save money. Up to thousands of dollars each year. That adds up to thousands over the life of your heating system.

So, take a home heating tip. Use natural gas. It's the finest heating system. Wish advantages that outweigh any other.

★ We do Custom Grinding & Mixing or we have on hand ready to go, ground our corn, ground milo & ground shell corn for mixing.
★ We handle a complete line of Wayne Feeds. Also a complete line of seeds and liquid or dry fertilizer.

John Mahalitt, Jr. Gets Corn Yieldmaster Club Membership

A corn yield of 147 bushels per acre has earned a Yieldmasters Club membership for John Mahalitt, Jr. of Eagle Lake. The Yieldmasters Club yearly selects for membership 1,500 of the nation's outstanding corn and grain sorghum producers.

Mahalitt planted DeKalb XL-724 on March 20, putting in 24,000 seeds per acre in a field where soybeans grew in 1980.

The Colorado County farmer fertilized with 121 pounds per acre of actual nitrogen, 57 pounds of phosphate and 9 pounds of sulfur. He used 1 quart of Bloop to control weeds and 8 pounds of Furadan to keep the insects under control.

Mahalitt harvested the 21.9-acre yield check on September 14. The grain

WCJC Homecoming This Saturday

Homecoming queen nominees have been announced by more than fifteen student organizations at Wharton County Junior College in Wharton.

Nominations ended Friday, October 23 and the winner of student elections will be crowned Saturday, November 14 during halftime ceremonies at the WCJC-Blinn Texas Junior College Football Conference game on sale at Tiger Stadium for \$2.50. Reserved seats for \$3.00. Children 11 and under are charged \$1. WCJC students are admitted free with their identification cards.

The public is invited to the many pre-game events of homecoming week. General admission tickets to the TJCFC football game at Wharton County Junior College on Saturday, November 14 during halftime ceremonies at the WCJC-Blinn Texas Junior College Football Conference game on sale at Tiger Stadium for \$2.50. Reserved seats for \$3.00. Children 11 and under are charged \$1. WCJC students are admitted free with their identification cards.

Breach Of Contract Filed Against LCRA

A suit seeking \$188.5 million in damages has been filed against the Lower Colorado River Authority by its two largest wholesale customers for breaching existing power sales contracts and forcing the signing of new contracts "under duress," driving up the cost of electricity to Central Texas customers.

Pedernales and Bluebonnet Electric Cooperatives have filed suit in 98th District Judge Hume Cofers court, seeking to have their 1974 contracts with LCRA declared "null and void" and the award of damages resulting from subsequent overcharges after LCRA arbitrarily cancelled 25-year contracts that had been signed in 1962.

Federated, headquartered in Johnson City, is seeking \$93,444,517.02 in damages and Bluebonnet, headquartered in Giddings, is asking for \$45,059,409.12.

The suit, filed by Round Mountain attorney Judge A. V. Mourous and Austin attorney Donald S. Thomas, charges that LCRA did not seek "in any manner" to protect its customers when Coastal States Gas Producing Co. defaulted on its natural gas contract with LCRA in 1973.

LCRA entered into a fuel supply contract with Coastal States on Oct. 10, 1962, calling on Coastal States to provide natural gas from January 1, 1970 to January 1, 1985.

Bechtel Replaces Brown & Root On So. Texas Project

South Texas Project manager Houston Lighting and Power Co. and Brown & Root were unable to reach an agreement on Brown & Root's continued role as contractor since it was replaced as architect/engineer by Bechtel Power Corp. September 24.

"Design engineering will continue as well as limited site work while we find another qualified construction contractor," said CPL Executive Vice President Bob Range. "CPL remains committed to the construction of the plant."

Brown & Root, who served as architect, engineer and construction contractor since work started at the plant in 1976, currently has a work force of about 2,000 on site.

Bechtel Power Corp. has an engineering work crew currently at the plant site, but has not been assigned construction work by HLP and the three other owners in the 2,500,000 kilowatt nuclear generation station.

"We will find a qualified construction contractor," stressed Range. "Plans are being formulated to allow the transition to go quickly and smoothly."

Bechtel Power Corp. has an engineering work crew currently at the plant site, but has not been assigned construction work by HLP and the three other owners in the 2,500,000 kilowatt nuclear generation station.
