only reasonable to assume that we shall have some catch-up buying as 1982 progresses. Of course, the high level of interest rates also served to stifle business equipment demand, but these promise to be a less inhibiting factor in the year ahead. Indeed, interest rates have already worked down to levels that are appreciably less prohibitive to borrowers. 1982 - Recession To

Expansion Judging from the behavior of various key economic indicators, the last quarter of 1981 will prove to be the low point for the year's business performance. After an unexpectedly vigorous advance in the first three months, the economy softened a bit during the ensuing two ouarters and then slumped sharply to close out the year immersed in a genuine recession. Thus, we have slipped into recession twice in consecutive years. Yet, unlike 1980's credit-restraint-fostered economic drop, which began and ended within that year, the recession of 1981 out to be true, estimates of ment in monetary conditions will likely carry over into federal budget deficits in this could revive the housing. early 1982.
