### House Damaged By Fire Mon.

Eagle Lake volunteer firemen are shown battling a blaze which gutted a wood frame house on First Street at around 9:30 a.m. Monday.

### Firemen Called To Truck, Mobile Home, House Fires

Eagle Lake volunteer firemen were called to three alarms during the past week. One fire at a truck being salvaged at Cantu Truck Repair at intersection of FM 1093 and FM 3013 last Wednesday evening; to a fire which caused heavy damage

to a mobile home on East Main early Monday; and to a fire which gutted a house on First Street at around 9:30 a.m. Monday. Workmen were doing some cutting with torches on a truck at the Cantu business when the truck caught fire also igniting grass under the truck. The truck had fuel in the tank and hydraulic oil in a reservoir and firemen spent considerable care and time in cooling off these units in order to prevent a possible explosion.

At 2:05 a.m. Monday, the firemen were called to the mobile home owned by Dwan Reyes at 411 West Main, across from the former Farmers Supply Co. location. Fire apparently started from a space heater and before the blaze could be brought under control, the mobile home and contents had excessive damage.

At 9:30, also Monday morning, the firemen were called to a fire at a house owned by George Whitlow found no body.

but occupied by Grace Lewis and family on First Street in the "flat" section. By the time firemen arrived, the wood frame structure was engulfed in flames and only the hull of the building was saved. All contents were destroyed by the fire. No one was at home at the time of the fire. Neighbors reported a five-year-old child might be in the house. He attends kindergarten classes at Eagle Lake Middle School and a check there revealed that he was not due to arrive until 11:00 a.m. Firemen searched the ruins but fortunately found no body.

**Comments On Calhoun Vaccination Proposals Sought**  
Regulations to require calhoun vaccination for brucellosis control under certain conditions are being proposed by the Texas Animal Health Commission. "This does not mean a 100 percent mandatory or compulsory vaccination program for all heifer calves," Dr. John W. Holcombe, executive director, TAHC, said. Amendments to the Texas brucellosis program now proposed by Commissioners of the TAHC require official calfhood vaccination of all heifers born after Jan. 1, 1982 which fit into these categories: 1. Heifers being moved into the state; 2. Heifers changing ownership. Commissioners are requesting public comments on the proposals. Additional hearings will be held on the matter before final action is taken. Comments on the proposals should be submitted to the Texas Animal Health Commission, Box 12966, Austin, Texas 78711-2966.

**Permanent School Fund To Reach \$9.4 Billion**  
Land Commissioner Bob Armstrong Monday released new revenue projections showing that the Permanent School Fund, which helps finance public education in Texas, should reach \$9.4 billion by the end of this decade - more than tripling the current size of the \$3 billion fund. "This is good news for the school children and all taxpayers of Texas," said Armstrong. "These figures represent the first firm estimates we have made on Permanent School Fund levels up to 1990 - and all the available information indicates the estimates are very conservative."

**Cong. Pickle Sponsors Anti-Crime Legislation**  
Congressman J. J. Pickle announced that he will co-sponsor new anti-crime legislation designed to protect police officers. Pickle, D-Austin, said he will join with Rep. Mario Biaggi of New York, in efforts to identify and ultimately ban a small class of handgun bullets specially designed to penetrate light armor, including the kind of bullet-proof vests worn by law enforcement officers. Police associations across the country have stated that they have no use for the type of bullet - the best known of which is the teflon-coated KTW - because of its excessive powers and unpredictability. Yet the bullet can be a dangerous weapon against law enforcement, as its velocity, shape and teflon coating make it able to penetrate even the sturdiest of bullet-proof vests worn by police and public officials. Before deciding to co-sponsor, Pickle said he touched base with several local law enforcement organizations and found they favored a ban. He also noted that the bill, H.R. 2290, is supported by the International Association of Chiefs of Police, and the Fraternal Order of Police. To date, no police officer has been shot with a KTW-type bullet, but officials fear the bullet is becoming more prominent, and hope to have it removed from the market before its destructive force is proven in a dark alley some night, and a police officer's family faced with the results.
