Stay alert and stay clear—

Avoid Contact With Power Lines

Think twice about your clearance overhead—and check it out carefully—anytime you're operating high-rise equipment around electric lines.

Cranes, drilling rigs, cotton module builders, hay balers and other big equipment become dangerous conductors of electricity if they contact power lines. Any contact could result in serious burns (or even death) for the operator and others nearby.

Although electricity performs valuable services for us every day, it must always be treated with caution—especially if you're working with equipment tall enough to tangle with electrical wires.

Stay alert—and stay clear of power lines!
