Solid Oak

Why Is Solid Wood Better?
Did you ever see a plastic or veneer tree?
All furniture is not created equal. Some is made the way fine colonial furniture has always been made...of solid woods...Oak, Maple, Pine. That's what we proudly feature at Franklin Furniture. Kincaid uses solid woods, thick, rugged, lasting. They take the time to properly air and kiln dry it.
They gently sand it to prepare the wood for a hand rubbed finish. They inspect every operation. There is pride in creating something that will last, that which will endure for generations yet unborn.
The average solid wood chest or dresser has 1" thick or thicker sides, fronts and tops. There is enough wood in that one piece of solid wood furniture to make 32 veneered chests or dressers. Today's veneers are only 1/32" thick.
Think carefully, which would you rather have? Then come see Franklin Furniture.
