ngineers and planners, commended the board hange the roof design by emoving the existing roof, installing two layers of ri-id insulation with a coal or pitch roof (4-ply), and se installation of approxi-mately 35 internal drains. The roof then would be warranted for 20-years nder a type of insurance ond. Cost would be 441,900.

The board voted to meet today to look over the recommendation and make decision. They could hoose only to re-roof the uildings with serious saks at a cost of approxi-mately \$150,000 less, ut the same problems hich caused the present saks would exist over the emaining two buildings, ith an estimate that they ould need similar repair 1 another two years or so.
