Green Thumb Ideas...

Herb gardening is gaining in popularity every year. Herbs are those plants that are used as flavoring agents. The common ones used in cooking are referred to as culinary herbs. The leaves of most herbs are the part most often used in seasoning. They are needed in very small amounts, so a few plants will be enough fresh and dried herbs for an entire season. Herbs make very attractive ornamental plants that can be used in flower beds, borders, rock gardens or corner plantings. They are easy to grow and fun to use. If you are interested in developing a green thumb herb garden, write for special Growing Herbs Information.
