This plastic box is important to you.

It's your connecting link to the telephone network.

This plastic box is a "network interface." That's where you join the local telephone network, which can also connect you to a long distance network.

It's this box where we terminate a pair of wires from our switching center to your residence. That's technically where our service ends, but not our concern for our customers. We want you to understand the importance of this interface device and the other changes which have taken place with the breakup of the Bell System so that you can relax and continue to enjoy good telephone service.

The network interface is being installed on the outside of most new homes, usually adjacent to the power meter. For others it may be found on the wall of a walk-in closet, a utility room or garage. Southwestern Bell Telephone began installing network interfaces in 1982, therefore, wiring installed prior to 1982 may not have a network interface. Unfortunately, not all of the older network interfaces are exact look-alikes, but they are similar.

From the network interface, you have at least three options on how to handle installation and repair of inside wiring and jacks to your telephones:

(1) hire Southwestern Bell Telephone to do it,

(2) hire another contractor,

(3) or save the money by doing the work yourself.

(Materials are readily available from numerous retail stores.)

If you choose Southwestern Bell Telephone to do the inside work, you should know about recently approved "Premises Work Charges," which include both time and materials. Premises Work

Charges are billed according to the time required to do the job.

Here is Southwestern Bell Telephone's schedule of charges:

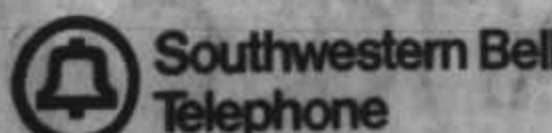

PREMISES WORK CHARGES FOR JACKS AND INSIDE WIRING	8 a.m. - 5 p.m. Mon.-Fri.	Other Times Mon.-Fri.	Sundays and Holidays
INSTALLATION Initial 15 min.	\$18.50	\$22.75	\$27.00
Each Addl. 15 Min.	\$10.50	\$12.50	\$14.75
REPAIR Initial 15 min.	\$28.25	\$31.75	\$35.25
Each Addl. 15 Min.	\$10.50	\$12.75	\$15.00

These charges are similar to those made by other service personnel for work performed on customers' premises. Remember, too, that while inside wiring and the workmanship required to install or repair it may be obtained from many sources today, we're still in the business, if that's your choice.

When we complete the work, you get a 30-day warranty against defects and malfunctions from the date of installation or repair. For your convenience, keep your Southwestern Bell Telephone warranty handy.

We sincerely hope this information will be helpful to you in the future. We know most of our customers still have a lot of questions about the changes which have taken place since divestiture.

While we are no longer responsible for every facet of your telephone service like we used to be, serving you is still our only business. After all, it's AT&T we separated from... not you. And, in the coming weeks, we will be reviewing other information you'll need to help you understand—and enjoy—the benefits of the new Information Age.
