Private Label, Or Store Brand Products Are An Important Factor In Your Choice Of Food Because They Offer Premium Quality Products For Less!

The U.S.D.A. has established grading systems for many food products. Most are based on color, flavor, texture, size and shape, or in the case of meat, the ratio of lean to fat meat. Words, numbers or letters of the alphabet are commonly used to identify the different food grades. In addition to grading, we make sure it tastes and looks good and contains extra information you want and need on the label whenever possible.

There are three major categories for many natural and processed foods. You may be familiar with the grade mark on some dairy, frozen foods, meat and/or produce items. However, the grade designation does not usually appear on canned goods and packaged foods. Most canned goods, frozen, and dried foods are packaged according to government standards whether or not the grade is indicated on the label. Generally, the price of the product is an indication of the grade.

So if you're looking for quality, value and freshness for your family, and at a price that you can afford, try our True Value and Rainbow Brand products for quality you can trust!!!
