List your activities by October 1

The winter "Calendar of Texas Events" is already being planned. It covers the months of December, January and February. Anyone wishing to have their activities published, should get them in by October 1 if they wish to be included.

The "Calendar of Texas Events" recognizes happenings in Texas, and is the basis for each month's "Fun Forecast" in Texas Highways magazine. Every radio and TV station receives a copy. Many regional and national magazines use the calendar for ideas about feature stories, and travel counselors at Texas Highway Tourist Bureaus refer to it daily in suggesting destinations for visitors to Texas.

If you'd like folks to know a little more about your events, please include a brief description from which a few words will be written in addition to the event's title.

For more information or to have your event published, contact the Chamber office in Eagle Lake, 234-2780; Thomas Insurance, 234-2619, or The Headlight, 234-5021.

Grandparents Day is Sept. 8

America's grandparents have contributed decades of hard work, brainpower and love to our society. Now, with the observance of National Grandparents Day, their contributions are being recognized.

The Texas Department on Aging, in conjunction with the national observance of this holiday on September 8, is providing free certificates of recognition to deserving grandparents all over the state. These certificates, which are suitable for framing, are signed by Texas Governor Mark White

and O.P. (Bob) Bobbitt, the executive director of the Texas Department on Aging. Churches, schools, community organizations and senior centers can all use the certificates, which are inscribed with the words "An Outstanding Grandparent," in ceremonies honoring senior citizens in local groups.

WHY DENTAL INSURANCE
 Consider these statistics: Of children over fifteen, 75% have some form of gum disease and an average of 11 cavities. By middle age, 2 out of 3 people will have serious gum problems and be well on the way to losing all of their teeth.
 Why should such a technological advance as dental insurance be such a poor state of dental health? The answer is: neglect! Few Americans see a dentist as often as they should and many have NEVER seen one. There are many reasons for this and one of them is money. Now something is being done about it.
 While most Americans have some kind of medical insurance, dental insurance has lagged far behind, but now dental coverage is growing in leaps and bounds. Today, some 65 million (3 out of every 10 Americans) are covered by some form of dental insurance and estimates are that coverage could increase to 95 million by 1985. Labor unions have been strong for wider dental protection and are responsible for much of this increase. In these times of inflation, the average American can use all the help he can get.
 Prepared as a public service to promote better dental health, from the office of DAVID W. EUERS, D.D.S., 704 S. McCarty Avenue, Eagle Lake, TX 77432.
