Sunshine Bluebirds learn about nature

The third grade Sunshine Bluebirds spent the month of November learning about nature and conservation. In addition to working on the 'Solo Flight' patch, the group started to work on their 'Wise Old Willie' patch.

'Wise Old Willie' is an owl with seven uncolored tail feathers. As the requirements for each tail feather are completed, the group gets to color them. When the patch is completed, it is sewn onto the member's sash.

'Wise Old Willie' will be teaching conservation to the group in a fun way.

The first week in November the Sunshine Bluebirds made litter bags to keep in their cars, keeping the bags emptied for a whole month. The next week, Thanksgiving cards were sent to new friends the members had made at Camp Winiwica. The group also tried something unique and delicious

Energy programs for science teachers

Central Power and Light Co. is making available to South Texas science teachers a new energy education program called Energy Skill Builders.

The skill builders provide science teachers up-to-date information on energy topics, said Charles Garrett, CPL manager in Eagle Lake.

"Energy plays a major role in our lives, and it's important that students have current information from which to learn."

CPL is offering the materials at no charge to science teachers in the seventh, eighth and ninth grades throughout its 44-county service area. An introductory offer to participate has been mailed to science coordinators and teachers.

The materials, which include student booklets and teacher guides, cover subjects ranging from fossil fuels and nuclear power to energy education.

One of the booklets, "The Nuclear Reactor," discusses the operation and physics involved in a nuclear power plant with a pressurized water reactor. Featured in this full-color information packet are photographs of the South Texas Project nuclear generating station.

CPL owns 25.2 percent of the plant, located in Matagorda County.

The Energy Skill Builders are associated with the Energy 80 program of science and technology developed by Enterprise for Education in California.

CPL has had a long-standing commitment to education in the South Texas area. The company also sponsors educational programs at the elementary and high school level, sponsors high school science teachers at summer workshops, places books on energy and electricity in public and school libraries in South Texas, and provides scholarships at 13 Texas colleges and universities.

Leukemia drive scheduled

Sharon Graham has been appointed chairman of the South West Texas Chapter of the Leukemia Society of America, Inc., 1987 Residential Campaign in Sheridan. Assisting in the Campaign will be the Sheridan 4-H Club.

Leukemia, a form of cancer that affects the blood-forming tissues, kills more children than any other disease — yet it kills more adults than children. The Leukemia Society of America, Inc., a national voluntary health agency with 57 chapters located throughout the United States, concentrates all of its efforts toward the problem of leukemia and related diseases, including lymphoma, multiple myeloma, and Hodgkin disease.

The Leukemia Society Chapter provides financial assistance to patients with leukemia and related disease. Currently the chapter has over 682 patients enrolled in the Patient-Aid program, one of the few remaining financial assistance programs offered by national health agencies.

The Society also supports research programs that investigate methods of controlling and curing the disease. As a national organization the Society allocated more than \$5.2 million toward its research program in 1986.

The Leukemia Society's South West Texas Chapter office is located at 906 Basse Rd., San Antonio, Texas 78212. For more information, please call collect 512-737-1777.

Combined Community Action board meeting December 10

Combined Community Action Inc. will hold its board of directors meeting on Thursday, December 10 at 7:30 p.m., 531 Colorado in La Grange. The public is invited to attend.
