## To all citizens:

How I do hope that all of us Texans who are privileged to vote will go to the polls November 5 if we have not voted absentee before that date! I am striving to understand the contents of the 13 propositions on the ballot. There is one that I have studied intensively, and that is Proposition 11 which is concerned with authorizing a state lottery. I sincerely believe that we who truly care for our state and the people thereof will vote against this

A lottery would be bad for the family, for business, and for state government. Some of the accompanying bad results could be increased gambling, credit disasters, extravagancies by lobbyists, increased crime, and extra burdens on poor people.

Please vote against Proposition 11. Sincerely, **Elizabeth Boothe**

Pharmacy & Your Health

According to Dr. Allen Steere, author of a recent article in the journal Modern Medicine, Lyme disease, a condition caused by ticks, can lead to heart, nervous system, and arthritic complications if the disease is not detected and treated during its early stages.

Campers, hikers, and people living in wooded areas should take extra precautions because of the presence of ticks in wooded areas. Lyme disease is caused by a bacteria that lives in ticks. Ticks bite humans and pass on the bacteria that causes Lyme disease. Symptoms of the disease are reported to appear as late as thirty days following the tick bite. The victim may experience red bumps, a bulls-eye rash, flu-like symptoms, fatigue, tiff neck, headache, chills, fever, and/or muscle aches.

If left untreated, Lyme disease often progresses into cycles of arthritic flare-ups. According to health experts, the most effective treatment for Lyme disease is with one of two antibotics, doxycycline or amoxicillin. ention of Lyme disease begins with the wearing of protective clothing then camping or when going into wooded areas and the use of an effective tick repellat
