Foot Facts

By Dr. Eric R. Tepper, Podiatrist

FEET: YOUR BODY'S FIRM FOUNDATION

For most people, the feet are about the least glamorous parts of the body, but they are also the most important. If you stop to think about it, though, feet deserve to be put on a pedestal as much or more than any other part. (How, after all, could you stand up there on that pedestal without them?) Each step you take takes your entire body weight down onto the 26 delicate bones and few square inches of tender tissue that make up the foot. Jogging or dancing multiplies that force by two or three times. It is also the job of the feet to defy gravity and pump blood back up through the veins in the legs and on to the heart. Face it: If your feet are in pain and not functioning properly, you are just not going anywhere!

The human foot is an amazing marvel. When its complex parts aren't working together properly to allow you to walk in comfort, it's time to seek a podiatrist's attention for diagnosis and treatment. As a physician who specializes in foot care, a podiatrist's extensive training provides the experience to treat a full range of foot and ankle disorders such as hammer toes, bunions, fractures, etc. For complete foot care for everyone in your family, we welcome you to call us at 234-5571, at the Eagle Lake Community Hospital. I am there the first and third Tuesdays of the month.

P.S. The average 55-year-old has walked more than 70,000 miles. That's equal to circling the globe two and a half times!

Stephanie Elizabeth Smith, 6 year old daughter of Stephen and Marlyce "Dusty" Smith, died at 5:11 p.m. last Thursday, Aug. 11, following a drowning at her home near Rock Island. (Stephen Smith is a full time officer with the Eagle Lake Police Department.)

According to a report from the Colorado County Sheriff's Department, a call was received at 4:05 p.m. reporting the drowning of a child at the Smith home.
