Juniors order senior rings

On Nov. 2 during the tutorial period, the Juniors at Rice held a meeting with Balfour representative, Tommy Smith.

Smith introduced the five factors which influence designing a class ring. They include style, material, stone, stone enhancements, and accents. Understanding the ring making process is very important in making a final decision in the selection of a ring

to be enjoyed for years to come.

Balfour returned on Wednesday, Nov. 9, to meet the students and their parents to order rings. Balfour was here from 5 p.m. to 7 p.m.

There was a \$50.00 deposit to place an order in which payments can be made in cash, money order, check, or credit card.

Balfour also issues a Time Payment Plan System for every student.

Who's Zat?

By Kristen Stienke

Look at this superwoman! The only clue given was that she is a senior.

Stephanie Labay and Chris Smidovet had no idea who it was. Garrett Hagendorf, Jodi Heard, and Dean Hengst guessed Crane. However, Jill Sanky, Greg Middleton, Brooke Crane, and Dana Leopold could not be fooled. They all knew this cute little girl was Alison Atkins.

Alison is the daughter of Bill and Julie Atkins of Garwood. She is a Varsity cheerleader and she plays the clarinet in the Mighty Raider band.

After graduation, Alison plans on attending Blinn College where she will try out for cheerleader. She is undecided on a future career.

ONITMENTS AND CREAMS: FIGHTING YOUR FOOT'S DRY SKIN

Most people are quick to pick up on skin dryness or blisters when they occur on the feet, but on the feet? The response is often, who cares! The problem with this attitude is that dry skin is at high risk of injury and cracking, which can lead to bacterial infection. Regular use of appropriate lotions or ointments can keep such problems at bay. Choose a moisturizing product that is 10 to 20 percent urea cream, and apply it after washing or soaking feet. Protect cuts, cracks, or moist sores with a zinc oxide ointment, which guards against friction and infection as well as acts as a tissue stimulant. Avoid greasy products like petroleum jelly, which can trap moisture and cause fungal infections.

Treat your feet to specialized care. You'll find we are as concerned as you are about the health of your feet. Whether your feet suffer from dry, cracked skin or hereditary deformity, we don't rush you into a predetermined treatment plan because we know each case is different and each patient has individual needs. New patients are always welcome. Call 234-5571, at the Eagle Lake Community Hospital, where we have office hours the first and third Tuesdays of the month.

P.S. People with poor circulation, particularly the elderly, are prone to developing dry skin on their feet.
