Southwestern Bell Is Offering "21st Century" Technology... AGAIN!

Southwestern Bell Telephone

Is Making Big Promises To Keep Its Monopoly.

Five years ago, Southwestern Bell made a deal with the Texas Public Utility Commission: the PUC would postpone rate hearings and loosen

regulation if Bell would upgrade telecommunications technology around the state. This deal did not work! Southwestern Bell's profits

are close to tops in the nation...but Texas ranks close to the bottom in advanced telephone technology. Now Bell is at the Texas Legislature with yet another deal: to invest \$1 billion in overdue improvements, but only if its earnings are kept under wraps, competition stalled, and

regulation further diluted. It's time to give the Bell monopoly a wake-up call; it's time to give consumers and businesses alike a choice

in local telephone service; and it's time to open the information superhighway in Texas to fair competition. If you own a phone, use a computer, subscribe to a newspaper or watch television, the telecommunications debate in the Texas Legislature will dramatically affect
