

# N. Lake Baptist Church July missionary lessons

Area: Effective prayer in ministry. Effective means equipped and ready for duty or action. Prayer is communicating with God, through Christ Jesus, by the way of the Holy Ghost.

First week: "Unselfish Spirit", Philp. 2:16

Unselfish means putting the good of others above one's own interests. We can't accomplish this goal without the help of the Holy Spirit. The words faith and prayer are the Christian's most powerful tool for communicating with the supernatural spirit.

Second week: "Submissive Spirit", Proverbs 4:20-24

Submissive means being dutiful, trust worthy and dependable. It also means to yield to the will or authority of another. And in this case, the one is God. We must realize that what we believe about God determines how we live and function for Him. To each individual who will put himself in the hands of the Holy Spirit, there is a specific task to do.

Third week: "Confident Spirit", Colossians 4:16

Confident means for sure, certain, no doubt in my mind. The Holy Spirit is an holy unseemly element. It was in existence before the foundation of this world. (John 4:24), states that God is a spirit. (Prov. 8:23, 25) King Solomon recorded, this about Abraham's God. I was set up from everlasting, from the beginning, or ever the earth was. Before the mountains were settled, before the hills were brought forth. "I am God."

Fourth week: "Triumphant Spirit", John 4:4

Triumphant means great joy of being a winner, success or achievement. (James 5:16) says, "The effectual fervent prayer of a righteous man availeth much." For we face many hardships that we can't come over or over come without the help of the Holy Spirit. We must always acknowledge the one that spoke this world into existence. Apostle Paul said (in Rom. 8:26), "For we know what we should pray for as we ought, but the Spirit itself maketh intercession for us with groanings which cannot be uttered."

## Help kids get along when they're home alone

Conflicts and arguments with friends and family are normal parts of children's development. It helps them become aware of the rights and needs of others.

This type of conflict is common during childhood and occurs more frequently when children are siblings of the same sex and near the same age.

While such behavior always concerns parents, conflict is especially worrisome when children are in self-care or latchkey situations.

Learning to get along and deal with this kind of conflict takes time, since children don't really have all the mental and verbal skills to do it independently until they reach early adolescence.

The 8th grade volleyball team at Eagle Lake Middle School gave their coach, Ginger Smith, a real nice present for her 36th. The girls took their match against La Grange-Monday night, taking it to three games. Hope you enjoyed your birthday, Ginger!

Even though this office has not been notified, a reliable source tells us that Sgt. Steve Hassin has been "relieved of duty", in other words, fired. Information is sketchy, but it appears some witnesses in a case under investigation gave a different version of information to the Chief after making statements to Hassin. More when available.

## Foot Facts

By Dr. Eric R. Tepper, Podiatrist FOR WOMEN ONLY

When Prince Charming eased Cinderella's foot into that glass slipper, she probably mistook a painted "Ouch!" under her toenail. These days, glass and foot-binding are out of fashion, but a host of new challenges is in. More women are spending time on their feet at jobs outside the home, and that time is often logged in nylon pantyhose and shoes with pointed toes and high heels. Among the problems often directly linked to wearing high heels are Achilles tendonitis and metatarsalgia. Nylons can trap moisture next to the skin, encouraging the growth of fungal infections, plus constrict the toes, leading to ingrown toenails and hammertoes. Bunions tend to be inherited, but shoes with narrow toe boxes can trigger them.

Buying the right shoes is an important part of foot care. Considering how much our feet do for us, the least we can do is provide preventive care before a problem occurs and professional care when and if they do. Whether it means a change in foot wear or a more medical approach, there's help for your aching feet, and lots you can do to make sure your feet stand up to years of wear and tear. For foot care for the entire family, we welcome your call at 234-5571, at the Eagle Lake Community Hospital. I am there the first and third Tuesdays of the month. P.S. Swelling and hormone production during pregnancy can aggravate existing foot problems as well as bring on new ones.
