## Vaccinations

Continued from Page 2

the vaccine, or you have a deductible that you must meet first and you can't afford at is time, you can sign up for the Texas Vaccine For Children program.

This program, of which the Thomas Clinic is a participant, provides these and other vaccines to children who have no insurance or are underinsured.

Speaking of other vaccinations, the chicken pox vaccine is now available!

As with the Hepatitis vaccine, this one is now being offered to all 11-year-olds who are at risk (if you've never had chicken pox, you're at risk!)

Again, being vaccinated against chicken pox is not a school requirement now, but it probably will be soon.

Although chicken pox does not usually cause a life threatening illness (it can sometimes), it can make life really miserable for those that get infected and causes more parents to miss

work days because of sick children than any other illness.

Think about it - chicken pox can be contagious for up to two weeks and your kid can't go to school during that time. So who gets to stay home with "Spotty"? - you guessed it - Mom and Dad.

So, take advantage of these new vaccines and protect your children!

Please call to make an appointment or for more information, please contact Lois Quenneville, PA-C, at Thomas Clinic, 234-2551.
