# Foot Facts

By Dr. Eric R. Tepper, Podiatrist

## 33 REASONS FOR ARTHRITIS

The ads for arthritis products usually focus on a pair of hands, showing someone gently massaging swollen fingers or painfully trying to button a shirt. The fact is, though, that the feet are often the first place to be affected by arthritis. Part of the reason is that arthritis is an inflammation of the joints, and each of your feet has 33 separate joints. When arthritis strikes the feet, the resulting joint swelling, pain, tenderness, and restriction of motion can be crippling. Fortunately, a podiatrist can help ease the symptoms and minimize the damage of arthritis, especially if the condition is diagnosed early. Treatment may include medication, exercises, special shoes and/or prescription inserts (orthotics), or surgery.

It's time to pay attention to what your feet are trying to tell you when each step is more painful than the one before. Don't ignore foot problems like arthritis, injuries, diseases, or inherited conditions. Your feet aren't supposed to hurt and there is help through the techniques of modern podiatry when they do. We offer complete foot care for infants to adults at Rice Medical Center. Please call 234-5571 for an appointment. I am there every Tuesday.

P.S. Joint injuries not treated promptly can lead to arthritis. Always seek professional attention for any injury to the foot.
