DPS Gives Back To School Reminder

As the new school year starts, the Department of Public Safety reminds motorists to slow down around schools and to watch for children who may be exiting school buses.

Drivers also should be aware that children might cross streets without watching where they're going.

"Avoid being distracted, pay careful attention to your driving, and always look for areas where a youngster may come out of nowhere," said Senior Trooper Gary Pflughaupt.

"When driving in the area of schools, through school zones, or around school buses, watch out for kids. You don't want to become part of a tragedy."

The most dangerous time for collisions is when school buses are loading or unloading students.

According to the National School Bus Loading and Unloading Survey, most children injured or killed while getting on or off buses are under the age of 10.

Students of all ages should be taught to follow safety rules and to watch for traffic before crossing streets.

It is illegal for motorists to pass a school bus when it is flashing its alternating red warning lights.

Drivers who do not stop for school buses face a fine up to \$1,000.

If a driver is convicted of this

offense more than one time, DPS can suspend their license for up to six months.

"Stopping for school buses is the law," Pflughaupt stated. "DPS has zero tolerance for vehicles that pass stopped school buses."

Please watch out for our children, they're too important to lose."

MOUTH AND THROAT CANCERS

More than 30,000 Americans will develop a mouth or throat cancer this year and males are twice as likely to be victims. You can play a significant role in early detection through self-examination. Here are some signs to look for:

- A sore that bleeds easily or does not heal.
- A lump or thickening in the cheek.
- Pain or numbness anywhere in the mouth or on the lips.

On the lifestyle front, smoking-cigarettes, cigars, pipes, or smokeless tobacco-is a leading cause of mouth and throat cancer. Also, drinkers are about six times more likely to develop an oral cancer than are non-drinkers. Combine smoking and drinking, and potential for trouble goes even higher. Some studies indicate that a diet high in vegetables and fruits may help prevent oral cancer.

Because successful treatment and rehabilitation are dependent on early detection it is extremely important to see your dentist for an oral cancer screening and regular check up at least every 6 months. Survival rates greatly increase the earlier oral cancer is discovered and treated.
