Quality Lawn Mowing Tips

To achieve a quality cut, you just need to follow a couple simple guidelines.

Don't Cut Your Grass Too Short
Cutting your lawn as short as possible may seem like a timesaver, but in truth it could end up creating more problems. Keeping your grass longer allows it to develop a deeper root system, establish better drought protection, and maintain a healthier look. Research your grass-type and its ideal length. As a general rule of thumb, avoid cutting more than 1/3 the height of your grass during each mowing session.

Check Your Blade
Mowing with a dull, nicked blade is like shaving your face with a butter knife: it can provide painfully poor results. Check your blade throughout the summer so you can get the most effective cut from your lawnmower. Be sure to check your owner's manual for blade sharpening instructions. If you're not comfortable sharpening the blade yourself, take it to your local power equipment service center.

Change Your Mowing Direction
Try to change direction each time you mow the lawn. If you mowed vertically last time, try mowing horizontally this time around. This will give you a more even cut and prevent the grass from growing in one certain direction.

Check Your Oil and Gas
Simple maintenance procedures like checking your oil and using fresh gasoline can greatly improve your lawnmower's performance. Most engine manufacturers recommend getting fresh gas every 30 days.
