

Annual Study Club Auction Information

By Betty Wilcox
It is getting to be that time again! The 29th annual auction held by The Eagle Lake Study Club will be held on September 20.
If you are a member of a group, be it family, card group, service organization or just a group of friends, please consider getting together to donate ONE larger item.
This will enable the Study Club to have a full auction with fewer items, there by reducing auction time. Different items on which to bid might be gift cards, stay at a hotel, a play, or perhaps a cruise for two. Good ideas are most welcome.

The silent auction and catered dinner will be held from 5 to 7 p.m. before the main auction as in the past.
Over the last 28 years this auction event has been held as the major support for the Eula and David Wintermann Library.
An important note to remember is that each dollar raised will be matched by the Wintermann Foundation, dollar for dollar — all money goes directly to the library for its operation.
So, mark your calendar for September 20, be present at the Eagle Lake Community Center for an evening of fun, and be as generous as possible.

Drugs Used to Manage Type 2 Diabetes

An estimated 20 million Americans have a condition commonly referred to as *diabetes*. With type 2 diabetes, there is insulin resistance or decreased production of natural body insulin. Insulin is a hormone responsible for decreasing the amount of glucose in the bloodstream and regulating the use of glucose by body cells. In type 2 diabetes, glucose builds up in the blood stream because of a malfunction in either the production of insulin or cellular resistance to insulin. Signs of type 2 diabetes include increased thirst, frequent urination, and extreme hunger. The cause is not clearly known, although abdominal fat and inactivity may play an important role.

Healthy eating and regular physical activity are key components of keeping diabetes under control. Diabetes medications may be required in addition to healthy lifestyle habits. Sulfonylurea drugs, such as glipizide (*Glucotrol*) work to help the body produce more insulin. Metformin (*Glucophage*) improves the body's utilization of insulin, as well as helps the body to produce less glucose and absorb less glucose from food. Thiazolidinediones, such as pioglitazone (*Actos*) and rosiglitazone (*Glyset*) work to improve the body's use of glucose and help the body produce less glucose. Insulin therapy may be necessary for some persons with diabetes.

KJZT Donates To St. Mary's Nada Teen Choir

Each year Societies of Catholic Family Fraternal of Texas-KJZT focus on participating in work projects, parish projects and community projects throughout the State. Societies reaching Diamond Status receive \$100 to be donated to a community or parish project of their choice. Our Society Nativity of the Blessed Virgin Mary Society No. 17 of Nada has chosen to give the \$100 to the Teen Choir of St. Mary's Church in Nada. Bible Verse of The Week

"It was he who gave some to be apostles, some to be prophets, some to be evangelists, and some to be pastors and teachers, to prepare God's people for works of service, so that the body of Christ may be built up until we all reach unity in the faith and in the knowledge of the Son of God and become mature, attaining to the whole measure of the fullness of Christ."
Ephesians 4:11-12
