HOW'S YOUR TECHNIQUE?

Not sure if you're flossing correctly? Here are the steps for the best method. Keep in mind that dentists suggest daily flossing as a goal.

1. With your hands a few inches apart, wind about 18 inches of floss (a waxed floss is best) around both of your middle fingers.
2. Slide the floss delicately between your teeth to the gum line, curving the floss into a C-shape so you can rub each side of each tooth gently. Never snap the floss into the gums because this can cause bleeding and injure the teeth and gums.
3. Don't forget to floss the backs of your last teeth and molars; plaque can accumulate there too.
